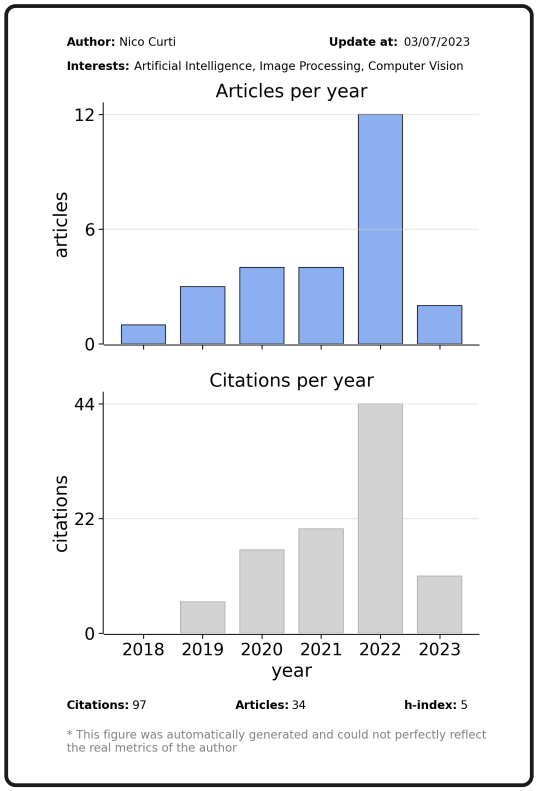
Academic History



Nico Curti was born in Cattolica (RN, Italy) on 28/09/1992. He obtained the bachelor degree in Physics in 2014 at the University of Bologna (BO, Italy) and the Master Degree in *Applied Physics* with the vote of 110/110 with laude, defending the work entitled *Implementazione e benchmarking dell'algoritmo QDANet PRO per l'analisi di Big Data genomici*, developed under the supervision of Prof. Daniel Remondini and Prof. Gastone Castellani. During his work of thesis, Dr. Nico Curti deepened his informatic skills, focusing his work on the implementation and optimization of algorithms applied on *high-performance-computers*.

Later, in 2019, he obtained the PhD in Physics, defending the thesis entitled "Implementation and optimization of algorithms in Biological Big Data Analytics", developed under the supervision of Prof. Daniel Remondini, Prof. Gastone Castellani, and Prof. Armando Bazzani at the University of Bologna. Dr. Curti collaborated with numerous international research groups during his PhD, and he developed applications of data analysis for several academic and private projects.

During the years 2019-2021, Dr. Curti was research fellow at the Dept. of Experimental, Diagnostic and Specialty Medicine of Bologna University, under the supervision of Prof. Enrico Giampieri, Prof. Emanuela Marcelli, and Prof. Gastone Castellani. Along this period he collaborated to numerous projects about biomedical applications, working side-by-side by expert clinicians. In particular, he worked on the analysis of histopathological images (WSI) developing machine learning models for the segmentation and characterization of biological tissues and microscopy analyses. The resulting *Decision Support Systems* aimed to facilitate and improve the clinical efficiency of the Azienda Ospedaliera IRCCS Sant'Orsola-Malpighi of Bologna. Furthermore, he collaborated with the Ophatmological Unit of the Azienda Ospedaliera IRCCS Sant'Orsola-Malpighi of Bologna, developing fully automated solutions for the evaluation of slit lamp images. Dr. Curti worked on several scientific research projects involving the application of *artificial intelligence* models on radiological images, involving CT, PET, and MRI formats. The resulting models were used for the automated segmentation of cancer volumes and radiomic analysis of the tissues.

From 2021 to date, Dr. Curti is a research fellow at the Dept. of Physics and Astronomy of Bologna University, under the supervision of Prof. Daniel Remondini.

Academic Degrees

2011	Diploma	Scientific High School A. Volta	
2014	Bachelor Degree in Physics	University of Bologna	*Integrazione di misure NMR e microscopiche per la descrizione quantitativa degli effetti di stress esterni su colture cellulari*
2016	Master Degree in Applied Physics	University of Bologna	*Implementazione e benchmarking dell'algoritmo QDANet PRO per l'analisi di Big Data genomici*
2019	PhD in Physics (Applied Physic)	University of Bologna	*Implementation and optimization of algorithms in Biological Big Data Analytics*

Prizes and Research Grants

2016	Research Grant	*Big Data Analytics di dati genomici e sociali high-throughput in ambiente HPC*
2017	National prize	*Premio Nazionale Giulia Vita Finzi* per la miglior tesi di laurea magistrale su attività di ricerca e sviluppo nell'ambito del calcolo dell'INFN
2018	Research Grant	*Applicazione di algoritmi di machine learning nel contesto della comunicazione medico-paziente, all'interno del progetto FILOBLU* (INFN)
2019	Research Grant	*Integrazione di dati clinici e multi-omici per la cura dei pazienti con patologie complesse e multisettoriali* (DIMES)
2020	Research Grant	*Computer Vision ed Intelligenza artificiale per l'armonizzazione e l'analisi di imaging medico e dati multiomici* (DIMES)
2021	Research Grant	*Machine learning ed Intelligenza artificiale per l'armonizzazione e l'analisi di dati multiomici del progetto HARMONY-PLUS* (DIMES)
2022	Start Cup	*Finalista* della Start Cup - Emilia-Romagna 2022 con il progetto imprenditoriale *HIDRA - Human Interactions in Disease Records and Atlases*
2022	Research Grant	*Machine learning ed Intelligenza artificiale per l'armonizzazione e l'analisi di dati multiomici in Oncoematologia (Progetto GenoMed4All)* (DIFA)

Teaching

2013	Volunteer at the Secondary School of the village of Guandumehhy, Mbulu district (Tanzania) as math and physics teacher.
2016	Tutor at the Science School of the University of Bologna for the teaching course *Analisi dati della fisica* of the master degree in physics (16 hours).
2020—2021 (2y)	Tutor at the course *Physical Methods of Biology* - 87995 (6 cfu) by prof. Castellani in the course of master degree in physics at the University of Bologna.
2020—2022 (3y)	Adjunct professor at the Science School of the University of Bologna for the teaching course of *Applied Physics* - 58200 (24 hours) at the school of Nursing.
2022	Elective course *AI4Medicine* at the Dept. of Experimental, Diagnostic and Specialty Medicine of Bologna University.
2023	Tutor at the course *Progetto Lauree Scientifiche Teoria dei network e intelligenza artificiale tra fisica, biologia e social media* at the Dept. of Physics and Astronomy of Bologna University (12 hours).

Conferences

Partecipation to the conference *Problems in discrete dynamics: from biochemical systems to rare events, networks, clustering and related topics - II Edition*, from 05/10/2017 to 07/10/2017, in which I discussed the work entitled *Learning by message-passing in networks of discrete synapses the traffic congestion prediction*.

Partecipation to the conference *EuroPar 2018*, from 27/08/2018 to 31/08/2018, in which I discussed the work entitled *Cross-Environment comparison of a bioinformatics pipeline: perspectives for hybrid computations*.

Partecipation to the conference *INFN BioPhys and PlexNet*, from 10/09/2018 to 12/09/2018, in which I discussed the work entitled *Cross-Environment comparison of a bioinformatics pipeline: perspectives for hybrid computations*.

Partecipation to the conference *INFN BioPhys and PlexNet*, from 24/09/2019 to 26/09/2019, in which I discussed the work entitled *Introducing the Complex Human Interactions in MEdical Records and Atlases Network - CHIMERA*.

Partecipation to the conference *AIM - Live Meeting*, on 16/10/2020, in which I discussed the work entitled *Automatic Pipeline for Identification of Ground Glass Opacities in CT Images of COVID-19 Affected Patients*.

Partecipation to *Notte dei Ricercatori* on 27/11/2020, in which I discussed the work entitled *Intelligenza artificiale in medicina - AI vs COVID-19*.

Partecipation to the conference *Next-AIM - kick-off meeting*, on 18/02/2022, in which I discussed the work entitled *Super Resolution in Medical Images*.

Partecipation to the conference *Complex System*, on 24/03/2022, in which I discussed the work entitled *Effectiveness of biological inspired neural network models in learning and patterns memorization*.

Partecipation to seminary *Medico per un giorno*, on 01/04/2022, in which I discussed the work entitled *Medicina del Futuro: Intelligenza Artificiale e Immagini Mediche*.

Invited Speaker to seminary *Intelligenza Artificiale in Senologia Parte II: Principi e Potenzialità*, on 16/02/2022, in which I discussed the work entitled *Intelligenza Artificiale: i diversi approcci*.

Invited Speaker to conference *Radiomics toolbox: Workflow and quality management*, from 07/09/2022 to 09/09/2022, in which I discussed the work entitled *Biophysics inspired neural network*.

Partecipation to the conference *XXII International Conference on Mechanics in Medicine and Biology*, on 20/09/2022, in which I discussed the work entitled *Semi-supervised active learning in automated wound image segmentation via smartphone mobile App*.

Partecipation to seminario *Occhio non vede Cuore non duole*, on 13/12/2022, in which I discussed the work entitled *Intelligenza Artificiale: cos'è e a cosa serve*.

Partecipation to the conference *Next-AIM - General Meeting*, from 13/02/2023 to 15/02/2023, in which I discussed the work entitled *Low-dimensional signatures from high-dimensional data: the DNetPRO algorithm*.

Training courses

Partecipation at the trainig course INFN International School of Bertinoro entitled *Eighth I.N.F.N. International School on architectures, tools and methodologies for developing efficient large scale scientific computing applications*, from 24/10/2016 to 29/10/2016.

Partecipation to *Intel-Code Modernization Workshop Rome*, from 23/05/2017 to 24/05/2017.

Partecipation to the conference *Due seminari sul tema dell'Intelligenza Artificiale*, 13/06/2018, introduced by Prof. Gianni Zanarini and Prof. Paola Mello.

Partecipation to the training course at the INFN Data Center CNAF of Bologna entitled *Implementazione di Sistemi di Gestione per la Sicurezza delle Informazioni in conformità alla Norma UNI CEI ISO/IEC 27001*, from 15/07/2019 to 18/07/2019.

Partecipation to *Call for Business Plan 2021* of the Bologna University.

Partecipation to *StartCup 2022* of Emilia-Romagna region.

Collaborations to academic thesis

2018	Sofia Farina	L-DM270	*A physical interpretation of network laplacian: role of perturbations and masses*
2018	Giovanni Marangi	L-DM270	*Teoria dei network applicata alle strutture proteiche*
2018	Lorenzo Dall'Olio	L-DM270	*Funzionamento di un pulsossimetro ed analisi di serie temporali pulsossimetriche*
2018	Mattia Ceccarelli	L-DM270	*Analisi della complessità di reti neurali generate tramite algoritmi genetici*
2019	Alex Baroncini	LM-DM270	*Sviluppo ed ottimizzazione di algoritmi per super-risoluzione ed object detection mediante deep neural network*
2019	Davide Ravaglia	L-DM270	*Modelling social behavior of Drosophila Melanogaster under the effect of drugs*
2019	Daniele Dall'Olio	LM-DM270	*Applicazione di un algoritmo d'apprendimento basato su sistemi fuori dall'equilibrio a dati di Genome Wide Association*
2020	Alessandro D'Agostino	LM-DM270	*Dataset generation for the training of Neural Networks oriented toward histological image segmentation*
2020	Mattia Ceccarelli	LM-DM270	*Optimization and applications of deep learning algorithms for super-resolution in MRI*
2020	Diego Cardinali	L-DM270	*Classification of Clausocalanus Furcatus motion utilizing the random walk theory*
2021	Davide De Paoli	L-DM270	*Reti neurali artificiali e apprendimenti basati sulla biofisica dei neuroni*
2021	Riccardo Biondi	LM-DM270	*Implementation of an Automated Pipeline for the Identification of Ground Glass Opacities on CT Scans of Patients Affected by COVID-19*
2021	Davide Panzeri	LM-DM270	*AI based prediction for brightfield and stained anatomopathology*
2021	Laura Verzellesi	LM-DM270	*Machine Learning methods for hepatocellular malignancies segmentation and MVI prediction*
2021	Giuseppe Filitto	LM-DM270	*Implementation of an automated pipeline to predict the response to neoadjuvant chemo-radiotherapy of patients affected by colorectal cancer*
2022	Caterina Faccioli	LM-DM270	*Spatial analysis in pathomics: a network based method applied on fluorescence microscopy*
2022	Stefano Bianchi	LM-DM270	*Introducing CHIMeRA: From the Development of a Comprehensive Biomedical Database to the Analysis of its Sub-Components*
2022	Daniele Buschi	LM-DM270	*Application of Active and Transfer Learning to wound image segmentation*

Collaborations

aa 2014	Bachelor Degree	Collaboration with the team MRPM leaded by Prof. Paola Fantazzini of the University of Bologna, performing the analysis of contrast-phase microscopy images. My contribution was highlighted in the scientific paper *Water compartmentalization, cell viability and morphology changes monitored under stress by 1H-NMR relaxometry and phase contrast optical microscopy* (L. Brizi et al.), published on *Journal of Physics D: Applied Physics*.
aa 2016	Master Degree	Collaboration with the Data Center INFN-CNAF for the implementation and optimization of algorithms applied to genomic Big Data on distributed computing architectures.
2016—2017	Dottorato	Collaboration with Unipol Assicurazioni for the optimization of the surveyors network in terms of spatial distribution and efficiency of the interventions.
2016—2017	Doctorate	Collaboration with the city of Venice and Telecom for the analysis of pedestrian mobility on a road network using ICTs data.
2017—2018	Doctorate	Collaboration with Canon and Fabbrica Digitale for the development of new technologies for the monitoring of pedestrian flows in the framework of *smart cities*.
2018—2019	Doctorate	Collaboration with INFN Center of Rome *La Sapienza* for the development of algorithms applied to *sentimental analysis* and *natural language processing*.
2019	PhD	Collaboration with the Ophtalmic Unit of the Azienda Ospedaliera IRCSS Sant'Orsola - Malpighi of Bologna for the development of *Decision Support Systems* applied to slit-lamp images.
2019—2022	PhD	Collaboration with the University of Milan - Bicocca for the development of automated systems for the standardization of microscopy and fluorescence histological images.
2019—2022	PhD	Collaboration with the Dermatological Unit of the Azienda Ospedaliera IRCCS Sant'Orsola-Malpighi of Bologna for the development of *Decision Support Systems* for the segmentation and evaluation of histopathological images.
2020—2022	PhD	Collaboration with the Dermatological Unit of the Azienda Ospedaliera IRCCS Sant'Orsola-Malpighi of Bologna for the management and analysis of chronic wound images.
2020—2022	PhD	Collaboration with the Radiological Unit of the Azienda Ospedaliera IRCSS Sant'Orsola-Malpighi of Bologna for the management and analysis of MRI, CT, and PET images.
2020—2022	PhD	Collaboration with the Hematological Unit of the Humanitas Research Hospital for the analysis of histpathological images.
2021—2022	PhD	Collaboration with the Electronic Microscopy Unit of the Azienda Ospedaliera IRCCS Sant'Orsola-Malpighi of Bologna for the analysis of TEM images.

Open Source Software

DNetPRO	*Discriminant Analysis with Network PROcessing*
NumPyNet	*Neural Networks library in pure numpy*
Openslide	*C library for reading virtual slide images*
Byron	*Build your own neural network*
rFBP	*Replicated Focusing Belief Propagation algorithm*
plasticity	*Unsupervised Neural Networks with biological-inspired learning rules*
scorer	*Machine Learning Scorer Library*
ParseArgs	*Simple command line parser in C++*
easyDAG	*Simple template DAG scheduler in c++*
genetic	*Examples about genetic algorithms for parallel computing*
shut	*Shell Utilities and Installers for no root users*
cardio	*Pulse oximetry data processing and classification*
BlendNet	*Network viewer with Blender support*
SysDyn	*System Dynamics script utilities*
nocs	*NOCS (Not Only Colliding Spheres) exact 2D gas dynamics framework*
rSGD	*Replicated Stochastic Gradient Descent algorithm*
Walkers	*Random Walk and Optimizer Simulator*
CryptoSocket	*TCP/IP Client Server with RSA cryptography*
FiloBluService	*FiloBlu Service Manager for text message processing*
anonymize-slide	*Delete the label from a whole-slide image*
ITKGraphThickness3D	*ITK module to compute graph from 3D thickness*

Programming skills

C/C++	ottima
Python	ottima
LaTeX	ottima
Bash	più che buona
Powershell	più che buona
CMake	più che buona
Matlab	buona
HTML/CSS	buona
JavaScript	buona
Java	buona
Android	buona

Furthermore, I have used programming languages like *Julia*, *Scala*, rendering softwares like *Blender* and *MeshMixer*, and virtual reality softwares like *SteamVR*.
